PROFILE

Hi, I'm Mercy. I design products, and then I can't resist **building them too**. I start by asking who it's for and what's getting in their way, sketch the simplest flow that fixes it, and polish it in Figma until it feels obvious. Then I **vibecode it into a real, working frontend** with AI tools, because a design you can click beats one you have to imagine. **Three years in**, most of my work lives in **fintech and Web3**, where a calm, clear screen is what makes people trust you with their money.

EXPERIENCE

Optiwear · Product Designer & Frontend
Jun 2026 – Present

- Designing and building a full eyewear store in **Next.js, React and TypeScript**, connected to an Express backend: catalogue, frame and lens configurator, prescriptions, bag, checkout and **Paystack payments**.
- Shipped camera-based **face-fit and PD measurement**, a frame finder, an **AI shopping assistant**, and admin and affiliate dashboards.

Resume AI · Product Designer & Frontend
Feb 2026 – Jul 2026

- Designed and built an **AI resume coach** that checks your CV, points out what's holding it back, and helps you **rewrite and refine** it until it sounds like the best version of you.

Expense AI · Product Designer
Jan 2026 – Mar 2026

- Explored a receipt-first expense tracker with automatic categorisation, budgeting and clear spending insights, and built an **interactive UI concept** to test the ideas.

Zenni App · Product redesign
Aug 2025 – Oct 2025

- Redesigned an eyewear shopping app in **42 screens**, including a step-by-step lens builder and virtual try-on, and shipped it as a **React + TypeScript** prototype.

Uglycash App · Product redesign
Apr 2025 – Jun 2025

- Redesigned a money app for getting paid, spending and trading in **49 screens**, built as a **React + TypeScript** prototype with a live balance and working send keypad.

Our Padi · Product Designer & Frontend
Jan 2025 – Feb 2025

- Designed a mental wellness app in **22 screens**, from mood check-ins to an AI chat bot and therapy booking, and built it in **React + TypeScript**.

Faveremit · Product Designer
Jun 2024 – Dec 2024

- Designed the **website landing page** and **key mobile app screens** for a fintech offering crypto and gift card trading, virtual dollar cards, transfers and bill payments.
- Built user flows, wireframes and polished UI with clear transaction steps, readable amounts and rates, and reusable components.

SKILLS

Design

Figma · User research · User flows · Wireframing · Prototyping · Design systems · Interaction design · Motion (After Effects)

Build

HTML & CSS · React · TypeScript · Next.js · Tailwind · Vite · Express

AI & shipping

Claude · Cursor · GitHub · Vercel

HOW I WORK

01 **Understand**
Talk to users and the team, map the flow, agree on success.

02 **Design**
Wireframes, high-fidelity screens and a component system.

03 **Build**
Vibecode the frontend so the design runs in a real browser.

04 **Refine**
Test the live build and hand off clean, working code.

FOCUS

Fintech · Web3 · Payments · Wallets · E-commerce

EDUCATION

University of Benin
2015 – 2021

Figma Essentials Course
2021 – 2022

Adobe After Effects Course
2022 – 2023
